

```

-- EVA Research Node – Stage 2 Schema
(ASSUMPTION-BASED DRAFT)
-- Engine: SQLite (ASSUMED –
db_path="eva.db" in api.py is suggestive,
not confirmed)
--
-- ⚠ This file was generated WITHOUT
core.py / models.py / tools/gateway.py.
-- Every field below is either:
-- [CONFIRMED] directly observed in
api.py request/response shapes
-- [ASSUMED] a reasonable guess
filling an open question from Stage 1 docs
-- Re-validate against core.py the moment
it's available. Treat this as a
-- starting point to unblock work, not as
ground truth.

-- NOT created as tables – left as
application-level enums per the
-- "agents / permissions may be enums-only"
open question in Stage 1 docs:
--   AgentName, AuthLevel, TaskStatus,
mission status, Classification
-- If core.py reveals these are DB-backed,
split them out in a follow-up migration.
```
